Art Unit: 1652

Claims 1-67 have been canceled. Claims 68-139 are at issue and are present for examination.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 68-77, 86-95, 104-113 and 122-131, drawn to mutant  $\alpha$ -amylases and compositions thereof, classified in class 435, subclass 202.
- II. Claims 78-85, 96-103, 114-121, and 132-139 drawn to DNA, vectors, host cells and expression of mutant  $\alpha$ -amylases, classified in class 536, subclass 23.2.

The inventions are distinct, each from the other because of the following reasons:

The DNA of Group II and the proteins of Group I are patentably distinct compounds because they are chemically different, the DNA has other utility besides encoding the proteins such as a hybridization probe and the proteins can be made by another method such as chemical synthesis.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, as shown by there different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
